

Send email directly from FileMaker
with this easy to use plug-in.

The SMTPit plug-in will allow you to send email directly from FileMaker, without the aid of a helper application. SMTPit enables you to send Email using To, From, Subject, CC, BCC, Email Headers, Attachments, and more. We have a few extra features such as headers and footers that are added to the body of email messages. SMTPit has several append functions which make it extremely easy to quickly build email messages. We also have functions to send HTML messages very easily. For your convenience, we have created a Configuration Dialog that allows you to set default settings for each feature. Emailing with FileMaker has never been so easy and flexible!

Features:

- Use normal email fields such as To, CC, BCC, From, Subject, and Body.
- Unique Header and Footer functions.
- Ability to append to all email fields. (With the exception of the From field)
- Include extra Email Headers, such as "X-Mailer: SMTPit".
- Attach files to your emails.
- Create HTML Emails complete with inline graphic images.
- Assign text or html files on your hard drive for the body of a message.
- Compatible with FileMaker 4, 5, 6, Mac OS 9, X, and Windows.
